

# Hadi Mobarra

Front-End Engineer | React · TypeScript · Open-Source Contributor

+98 914 748 2284 | hadimobarra@gmail.com | github.com/hadimobarra | linkedin.com/in/hadi-mobarra-99b88916b

---

## PROFESSIONAL SUMMARY

---

Results-driven Front-End Engineer with 3+ years of production experience building complex, data-intensive web applications. Active contributor to **OpenMetadata** — a leading open-source data catalog and governance platform — with merged pull requests spanning UI components, localization, and feature enhancements. Holds an M.Sc. in Computer Engineering (Iran University of Science and Technology) and is recognised by the **National Elite Foundation**. Delivers pixel-perfect, accessible, and performant interfaces using React, TypeScript, and modern state-management solutions in agile, cross-functional teams.

## WORK EXPERIENCE

---

### Front-End Engineer

Adin — Tehran, Iran

April 2023 – Present

- Architected a **large-file upload module** (Excel, JSON, TSV, CSV) using **Uppy.js** and the **TUS resumable-upload protocol**, enabling reliable multi-GB transfers with pause/resume and automatic retry.
- Built **Mapping Table & Mapping Column** interfaces (Databricks-inspired) to visually define entity relationships and streamline ETL / data-integration workflows — reducing onboarding time for data engineers.
- Developed a full-featured, searchable **Data Catalog UI** for discovering, tagging, and governing enterprise datasets, directly improving data discoverability across teams.
- Designed and shipped a **Role Management module** with dynamic, fine-grained access-control rules, replacing a static permission model and enabling self-service governance.
- Implemented a **group review & approval workflow** for the glossary module, enforcing data-governance policies and audit trails.
- Built an interactive UI for defining and orchestrating **ETL ingestion-pipeline stages**, giving non-technical users visibility and control over data flows.
- Led **full Persian (RTL) localisation** using i18next across the entire product, making the platform accessible to Farsi-speaking enterprise users.
- Rewrote and extended the metadata table schema (Persian title, English title, calculation method), improving cross-language data quality.
- Drove **performance optimisations** (code-splitting, lazy loading, memoisation) that measurably reduced initial load time and improved runtime stability.
- Owned end-to-end delivery of the **Add Pipeline page** — from requirements analysis and component architecture through API integration, form validation, error handling, and production release — providing users with a complete, self-service interface for configuring and registering new data-ingestion pipelines.

*Stack: React, TypeScript, Ant Design, Tailwind CSS, Zustand, Uppy.js, TUS, i18n/RTL, Git*

### Front-End Developer (Graduate Internship)

MCI (Hamrah-e Aval) — Tehran, Iran

November 2022 – April 2023

- Contributed to production-grade telecom dashboards using React, Redux Saga, and Material UI within a large enterprise codebase.
- Implemented responsive UI components with Sass/CSS following design-system guidelines; integrated Webpack build pipelines and Nginx-based deployment via Docker.
- Completed one month of structured training followed by five months working on live features in an agile squad.

*Stack: JavaScript, React, Redux, Redux Saga, Material UI, Sass, Webpack, Docker, Nginx, Git*

## EDUCATION

---

### M.Sc. Computer Engineering

Iran University of Science and Technology, Tehran

Oct 2022 – Sep 2024

Member of the National Elite Foundation (top academic honour). Research focus: distributed systems & software engineering.

B.Sc. Computer Engineering

University of Mohaghegh Ardabili, Ardabil

Oct 2017 – Sep 2021

TECHNICAL SKILLS

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| Languages        | TypeScript · JavaScript (ES2024) · HTML5 · CSS3                     |
| Frameworks/Libs  | React 18 · Redux · Zustand · React Query · Next.js (familiar)       |
| UI / Styling     | Ant Design · Tailwind CSS · Material UI · Sass · RTL / i18n         |
| Tooling          | Webpack · Vite · Git · Docker · Nginx · ESLint · Prettier           |
| Data / Protocols | Uppy.js · TUS Protocol · REST APIs · ETL concepts                   |
| Platforms        | Linux · GitHub Actions CI · OpenMetadata                            |
| Soft Skills      | Agile/Scrum · Async collaboration · Code review · Technical writing |
